

مقالات ٢٠٢٤

Pyrazole derivatives as antileishmanial agents: Biological evaluation, molecular docking study, DFT analysis and ADME prediction Original Article	Heliyon 10(23):-
Antifungal activity of Fe ₃ O ₄ @SiO ₂ /Schiff-base/Cu(II) magnetic nanoparticles against pathogenic Candida species Original Article	Scientific Reports 14(1):-
High prevalence of plasmid-mediated quinolone resistance in escherichia coli strains producing extended-spectrum beta-lactamases isolated from faeces and urine of pregnant women with acute cystitis	Molecular Biology Reports 51(1):-
Isoenzyme characterization of Leishmania infantum toward checking the antioxidant activity of superoxide dismutase and glutathione peroxidase	BMC Infectious Diseases 24(1):-
Global, regional, and national stillbirths at 20 weeks' gestation or longer in 204 countries and territories, 1990-2021: findings from the Global Burden of Disease Study 2021 Original Article	Lancet 404(10466):1955-1988
Design and expression of a chimeric recombinant antigen (SsIR-Ss1a) for the serodiagnosis of human strongyloidiasis: Evaluation of performance, sensitivity, and specificity	Plos Neglected Tropical Diseases 18(7):
Cross-Sectional Study on the Prevalence of Intestinal Parasitic Infections in Primary School Students in Kish Island, Iran	Journal of Health Sciences and Surveillance System 12(3):265-270
Enrichment of creatine-gelatin cryogel with Zataria multiflora essential oil and titanium dioxide nanoparticles as a potential wound dressing	Materials Today Chemistry 38:-
Comparative analysis of enzymatic profiles and biofilm formation in clinical and environmental Candida kefyr isolates	Environmental Microbiology Reports 16(3):-
Imidazole derivatives as novel and potent antifungal agents: Synthesis, biological evaluation, molecular docking study, molecular dynamic simulation and ADME prediction	

Bromelain-loaded silver nanoparticles: Formulation, characterization and biological activity	Journal of Molecular Structure 1302:-
Identification of Blastocystis spp. in Urban Rodents of Different Districts in Southwestern Iran: Subtype Distribution and Possible Zoonotic Potential	Inorganic Chemistry Communications 161,112006
SARS-CoV-2 mechanisms of cell tropism in various organs considering host factors	Acta Parasitologica 69(1):922-928
A novel outlook in the delivery of artemisinin: production and efficacy in experimental visceral leishmaniasis	Heliyon 10(4):-
<u>Leishmania major Infection in Synanthropic Rodents: Evidence for the Urbanization of Zoonotic Cutaneous Leishmaniasis (ZCL) in Southern Iran</u>	Pathogens and Global Health 118(1):40-46
<u>Antifungal Drug Susceptibility Profile of Candida kefyr Isolated from Clinical Samples and Dairy Products</u>	<u>Canadian Journal of Infectious Diseases and Medical Microbiology</u> 2024,4896873
<u>A new record of springtails, Drepanura pallens Rusek, 1981 (Collembola: Entomobryidae) accessed by delusional parasitosis (DP) from south of Iran</u>	<u>Journal of Asia Pacific Biodiversity</u> 17(1):163-168
<u>Corrigendum to "Antimicrobial and Anti-Biofilm Activities of Thymus fallax Essential Oil against Oral Pathogens</u>	<u>Biomed Research International</u> 2024(1):-
<u>Seroprevalence of Canine Toxocariasis in Three Rural Areas of Fars Province, Southern Iran</u>	<u>Iranian Journal of Parasitology</u> 19(1), pp. 38-44
<u>Antifungal properties of carvone and linalool against Malassezia species: Preliminary Screening Study</u>	<u>Current Medical Mycology</u> 10:-
<u>Molecular characterization of non-Cryptococcus yeast communities isolated from Eucalyptus trees</u>	<u>Current Medical Mycology</u> 10:-
<u>An intriguing approach toward antibacterial</u>	<u>Scientific Reports</u>

<u>activity of green synthesized Rutin-templated mesoporous silica nanoparticles decorated with nanosilver</u>	13(1),5987
<u>Evaluation of building washing machines as an extreme environment for potentially pathogenic fungi</u>	<u>Scientific Reports</u> 13(1):-
<u>Hospital-based retrospective analysis of 224 surgical cases of lung hydatid cyst from southern Iran</u>	<u>Journal of Cardiothoracic Surgery</u> 18(1),204
<u>Antifungal properties of carvone and linalool against Malassezia species: Preliminary Screening Study</u>	<u>Journal of Asia Pacific Biodiversity</u> 17(1):163-168
<u>Molecular characterization of non-Cryptococcus yeast communities isolated from Eucalyptus trees</u>	<u>Biomed Research International</u> 2024(1):-
<u>An intriguing approach toward antibacterial activity of green synthesized Rutin-templated mesoporous silica nanoparticles decorated with nanosilver</u>	<u>Iranian Journal of Parasitology</u> 19(1), pp. 38-44
<u>Evaluation of building washing machines as an extreme environment for potentially pathogenic fungi</u>	<u>Current Medical Mycology</u> 10:-
<u>Hospital-based retrospective analysis of 224 surgical cases of lung hydatid cyst from southern Iran</u>	<u>Current Medical Mycology</u> 10:-
